Python to scrap website and take snapshot
using Selenium

By Deepak Lohia

Automation Requirements
Programs to be installed
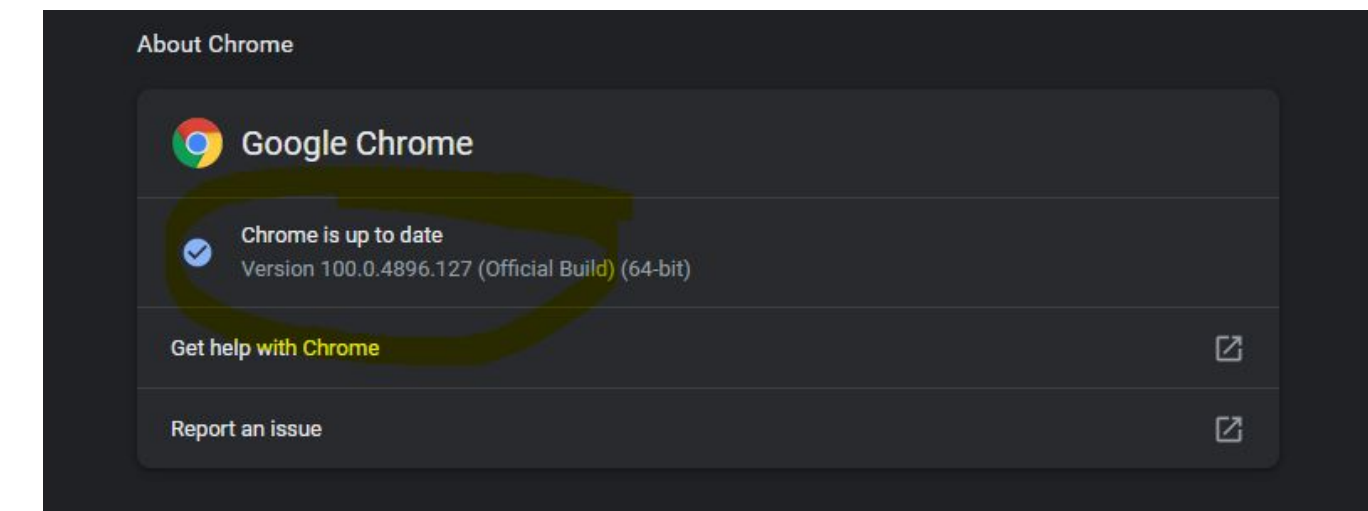

- Website for scraping

- Python 3.7 and above - https://www.python.org/downloads/

- Visual Studio Code (to run script) - https://code.visualstudio.com

Before running Python Script

Download Chrome Driver

1.Check your Google chrome browser version

Chrome Browser > Settings > Help > About Chrome

2.Download the same version of chrome driver and place in your driver folder

https://chromedriver.chromium.org/home

Install selenium using pip

install required libraries in Python for example for selenium run

"*pip install selenium*"

Run Code in visual Studio Code
open python script by using "OPEN FOLDER" option

Thank you
